

WE'RE ABOUT RESPONSIBILITY

Corporate Social Responsibility Policy

Sirius Minerals' vision is to become a leading producer of multi-nutrient fertilizer.

In delivering this vision we take our responsibility to the local area very seriously and are committed to taking an active and positive role in the local community. This means minimising the potential adverse impacts on people living and working in the area, making a meaningful contribution to social and economic well-being, keeping the community informed as our Project develops and responding quickly to questions and concerns.

Building positive relationships with the community and local stakeholders is central to our approach. We are accessible and transparent in the way we engage the community and treat everyone that contacts us fairly and with courtesy.

We are committed to employing local people, working with local businesses, providing opportunities for young people and helping schools to raise the skills and aspirations of children across the area. The Sirius Minerals Foundation has been established to fund community projects and, in addition, our team supports charity partners.

Responsibility is one of our core values. Underpinned by strong leadership and shared accountability we will deliver significant benefits in the Project area for many years to come.
